

When choosing milling cutter, have such worry?

Bemused A: Process tall hardness rolled steel, cannot carry fast. Carry fast edge to be able to die.

Bemused B: Machine the milling cutter with rapid rate, a bit harder a moment ago did adventitious again.

So, do not have a milling cutter, OK and eclectic?

Some, small today make up introduce for you -- Misaimi is brand-new milling cutter of hard alloy series, GCP series.

Treatment rate is rapid

Hardness of identical HRC 50 processes material, same blade diameter is the milling cutter of 3mm.

Milling cutter of series of Mi Saimi GCP machines speed, think of milling cutter of series of rice ace XCP than rice, want 1.5 times faster.
