

## Of different helix angle establish millin cutter, how should distinguish use?aa

### Problem

How should distinguish use different helix angle establish  
cutter?

The helix angle that establishes milling cutter includes a va  
point of view such as  $30^\circ$  ,  $45^\circ$  ,  $50^\circ$  , how should distin  
use?

### Reply

The effect of helix angle

If establish the helix angle of milling cutter to increase, cr  
the osculatory length of workpiece and cutting blade can  
lengthened, bear of susceptible of place of blade of the cu  
unit length can decrease, because this is helpful for life o  
promotion cutting tool. Contrary, because cutting obstruc  
increases, must consider to use clip to hold the knife han  
taller tigheidity to wait so.
