The characteristic of milling cutter of series of V of artisan essence tool

Artisan essence tool rolled out milling cutter of hard alloy of V series whole in the market first. This series product embarrassed to process data and be developed only, solved temperature of cutting muscularity, cutting effectively tall, cutting tool wears away to wait for a problem badly. In applying to low hardness material, titanium alloy, stainless steel, the difficult treatment material such as nickel radical alloy, there is wide applied perspective in aerospace and other industry department.

Cutting tool point of a knife designs C part, can rise to protect action to point of a knife, effective precaution is processing hard data or when material has foreign matter, occurrence point of a knife wears away or this plants collapse horn the happening of the circumstance, improve cutting tool life thereby.

Milling cutter of series of V of artisan essence tool is designed through optimizing cutting tool appearance, link rigidity and their improvement that machine a method, material of will difficult treatment is efficient treatment turns into likelihood.

The characteristic of milling cutter of series of SUS of artisan essence tool

The following two cutting tool are nodded by a lot of clients assist, have overturn sexual innovation design, innovation characteristic is gigantic much.
