

Diameter 0.01 millimeter milling cutter comes out, can be on hair silk carve characters on a sealaa

Milling cutter is the whirl that has one or more tooth cutting. It is an important and referenced index that is produced in the treatment industry subtly. 5 years ago, a Chinese company of new and high Jin Zhou developed tungsten successfully recently diameter the dinky diameter milling 0.01 millimeter, came true to go up machine treatment. Unlike the dinky diameter milling cutter of 1/8 of diameter human hair silk about, personnel of research and development gave 56 Chinese characters in a Mi Shangxi, on silk of a gave 7 letters.

According to introducing, this breaks through what wait for information of electron of the our country that help strengthen medical treatment a lot of domain to carry upgrade character also will make miniature machine a tool to develop more better.
