

The computation of parameter of cutting tool cutting of CNC treatment is formularyaa

So, understand more always is right, baobuqi has better progress after you went to big company of interview what, not be. Good, we see these below formula is what appearance after all.

1. linear velocity (outside the rate that Zhou Ren carries)

Definition: What is tool of linear velocity ? outside Zhou Ren is when circumgyrate, inside unit time (inside 1 minute) can advance to more or less be apart from (? of ? of ? of unit ? ?)

I looked for some cutting tool parameter, everybody can consult
