

# The whole world and China exceeded hard alloy milling cutter 2024 market prospect is forecasted

[China End Mills / End Milling Cutter](#)

Image not found or type unknown

The whole world exceeded dimensions of market of hard alloy milling cutter to make an appointment with 100 million yuan 2023, CAGR of annual and compound increase rate is 2019-2023 about % , predicting future will carry the state that grows smoothly continuously, to 2030 market dimensions will be close to 100 million yuan, 6 years CAGR is future % .

Exceeding hard alloy milling cutter is to point to use the milling cutter that exceeds hard data to be made, have extremely tall wearability, compressive strength and good cutting performance. As manufacturing industry upgrade and transition, increase ceaselessly to the demand of tool cutting of high quality, high accuracy, the development perspective that exceeds hard alloy milling cutter is very wide.

Article survey and analytic whole world exceed hard alloy milling cutter to develop the current situation and prospective tendency, core content is as follows:

(1) global market is overall dimensions, mix by sales volume respectively undertook by income statistic is analysed, historical data 2019-2023 year, calculate data 2024 to 2030.
